PROFFESIONAL EXPERIENCE

- **GammaStack (Grep Ruby Webtech Pvt. Ltd). , Indore**
  Solution Engineer (March 2021 – Present)
  Gammastack provides solutions for e-sport, fantasy sport games and software. Here I am working as a Solution Engineer, where my responsibilities are to develop the backend apis for newly launched app and develop a frontend for web-apps using React JS, Redux, Material UI.

- **Engineerbabu Pvt. Ltd. , Indore (Startup)**
  Backend Developer (October 2019 – November 2020)
  Created all the backend api for the newly launched App and their Admin panels Based Developer-Client product on Node js, used Firebase for push notification, passport js for JWT Authentication, SendGrid Library to send emails, MSG91 and Twilio Library to send sms, used Knex SQL Builder tool along with Objection Js for managing Postgres based Database. Also had an experience using Postman Collection.
  Some of the projects:

  1. **Favos** - https://favos.co/admin, https://favos.co/ **(Duration -** 6 Months**)**
     Developed APIs for the for a FAVOS food ordering app, website and Admin Panel. The panel controls all the activities of the project like merchant lifecycle management, order placement and tracking, QR code generation for contact-less orderings from apps, as well as reports and dashboard management of all companies. App flow concentrates to provide best food facilities by providing different order types (Dinein, Pickup and Delivery).

  2. **Butterfly** - https://butterflyapp.co/admin, https://butterflyapp.co **(Duration -** 3 Months**)**
     Developed APIs for the Admin Panel. The panel controls all the activities of the project like location checkins and checkouts of user, as well as reports and dashboard management of all companies.

  3. **Tiffin Plate** - https://admin.waitty.com/ **(Duration -** 4 Months**)**
     Developed APIs for the for a Tiffin Plate Admin Panel. The panel controls all the activities of the project like merchant lifecycle management, order placement and tracking, QR code generation for contact-less

orderings from apps, as well as reports and dashboard management of all companies. App flow concentrates to provide best food facilities by providing different order types (Dine in, Pickup).
